

FAXCOM for HP

Users can fax from the HP digital sender 8000, 8100, 9100c and 9200c as well as from the lj9000, lj9040, lj9050, lj9500, lj4100, and lj4345 Multi-function Peripherals (MFPs).

Inbound faxes can be received automatically to any printer on the network, including the lj9000, lj9040, lj9050, lj9500, lj4100, and lj4345 Multi-function Peripherals (MFPs).

Deploy Fax Capabilities Throughout The Organization

FAXCOM for HP integrates seamlessly with the HP line of multi-function peripherals (MFPs) to implement network fax capabilities throughout an entire organization.

By combining FAXCOM Server and FAXCOM gateway software with an HP Digital Sender 8000/8100 or 9200C or with either the 4000 or 9000 series, the MFP becomes truly multi-functional. In addition to printing, copying, and scanning, the HP network appliance becomes a component of a robust, sophisticated enterprise fax management system.

Implements Automatic Routing To The MFP In Addition To Send Capabilities

To enable the automatic inbound routing/printing of faxes to any HP MFP on the network, you simply add the HP MFP as a user with its own Route ID to the FAXCOM Gateway User List. The Route ID can be either DTMF number-based, DID number-based, or FAXCOM Server port-based, whereby all faxes received on a specified port are routed to the specific MFP.

To send faxes, network users walk up to the MFP or Digital Sender, load the document, press 'fax' and enter a fax number. The document is then transferred via TCP/IP to the FAXCOM and faxed.

Supported Technology:

FAXCOM Server

FAXCOM for Windows or FAXCOM for SMTP fax gateway software

HP Digital Sender 8000, 8100, 9100c or 9200c

HP lj9000, lj9040, lj9050, lj9500, lj4100, or lj4345 MFPs

About Biscom

Since 1986, Biscom has been widely recognized for its pioneering advances in the technology of enterprise fax management. Biscom provides software-based and complete turnkey information technology systems to some of the world's leading companies. The company's FAXCOM Servers provide enterprise-wide solutions that are reliable, scalable and flexible.

In addition to its well-established leadership in the fax server market, Biscom is an innovator in new business communications technologies including: secure file transfer solutions with FileMarshal (www.filemarshal.com), secure document delivery solutions through the acquisition of vvault (www.vVault.com), file conversion technologies through the Lincoln & Co. division (www.lincolngo.com) and Internet-based video surveillance applications through WebEyeAlert
