## Connector for ShareScan OP Seamless Integration with MFPs

*Biscom's FAXCOM Connector for ShareScan OP solution provides companies with enterprise-wide fax management capabilities that are seamlessly integrated with MFP devices*

FAXCOM Servers provide users with automated electronic faxing capabilities integrated directly into their corporate messaging system. By coupling the FAXCOM Server with eCopy's ScanStation OP Server and an MFP device, scanning and faxing paper documents is as easy as photocopying them. Plus, hard copy documents may be electronically distributed at speeds of up to 50 pages per minute.

The Biscom Connector for ShareScan OP can use LDAP to authenticate users, minimizing administration. Faxed documents received at the computer desktop are treated just like any other electronic file, to be accessed, stored, printed, resent, etc.

### Features & Benefits

- User-friendly touch screen interface - scan & fax at the touch of a button
- Preview faxes before sending - verify page layout and continuity
- Scan, fax & store hard copy documents - to create document archive
- Completely scalable - for workgroups both large and small

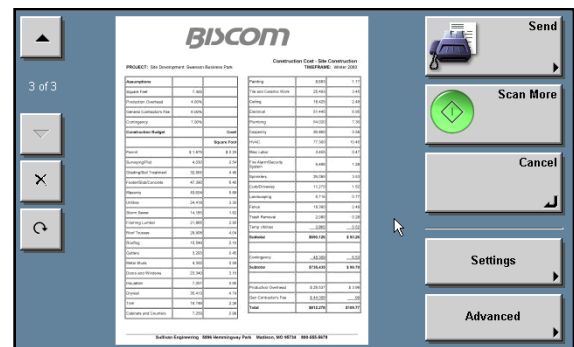

#### Outbound Fax

#### Inbound Fax
